

LA BELLA VERDE

**LBV35** Solar-electric catamaran  
Fully recyclable

**LA BELLA VERDE**

“

Pioneers of the  
green boating  
movement

We launched in 2014 as Ibiza's  
first and only emission free charter  
company with solar-electric  
catamarans.

In the past 6 years over 10,000  
happy charter clients have enjoyed  
our services, helping us develop a  
solid business model as experts in  
eco boat building and refits.

Our business is based on our deep  
passion for marine conservation  
and of course, sailing!

## Setting the standards for the future

La Bella Verde has set sail towards a more sustainable nautical industry.

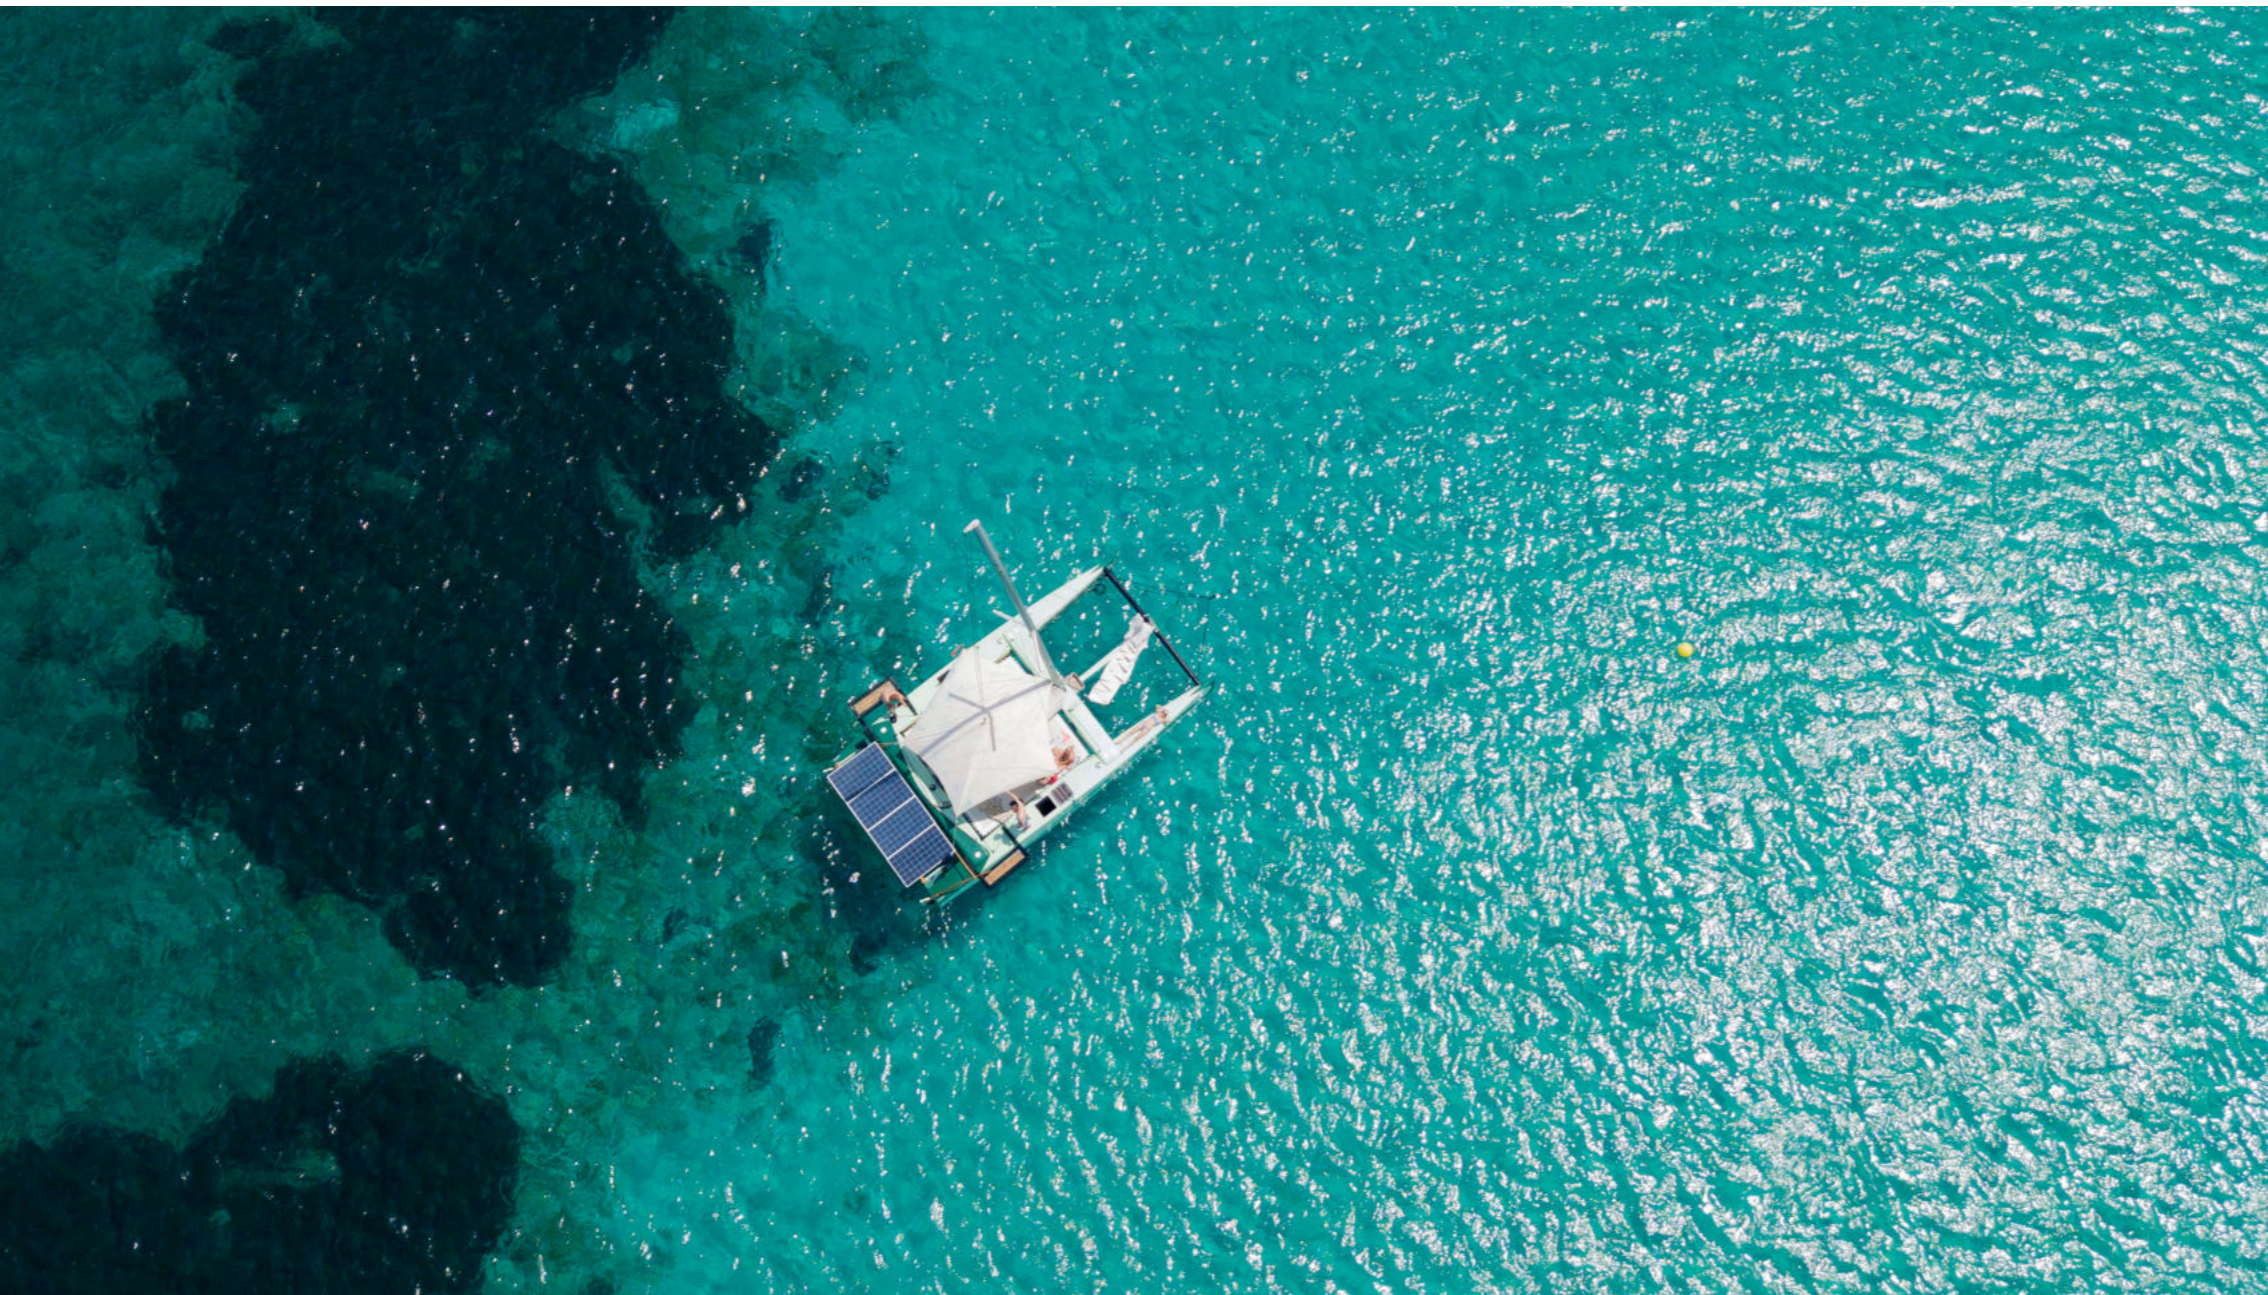

Through the application of cutting edge technology and materials, we are revolutionizing the way boats are built.

The LBV35 is the first model of our new range of fully recyclable, solar-electric boats.

“

# The LBV35: The essence of eco-tourism

## **The LBV35**

Together with award-winning designer, architect and shipyard Innovation Yachts, we have designed this catamaran to embody the essence of eco-tourism.

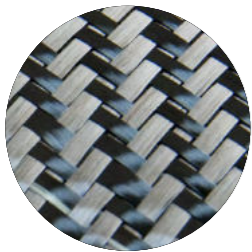

## **INNOVATION YACHTS**

With respect for mother nature as our highest objective, we have designed this catamaran to lead the way in the green boating movement.

The open deck, innovative hull-design and silent electric motors create an unprecedented sailing experience.

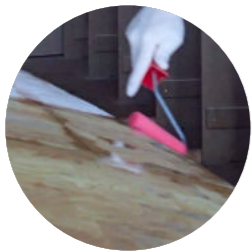

## Construction

To optimize strength and minimize weight, the LBV35 is built with innovative vacuum techniques using high grade and sustainable materials:

### **Volcanic Fibre**

Fully recyclable  
and osmosis-resistant

### **Epoxy Matrix**

Fully recyclable,  
harmless to health  
and nature

### **FSC-certified Balsa Wood Sandwich Cores**

Strong, extremely light  
and grown by nature

### **PET-foam Sandwich Cores**

Recycled and  
recyclable

“  
Where  
quality meets  
sustainability

“

# World's first recyclable composite boat in serial production

## Recyclability

To battle the highly unsustainable nature of the nautical leisure sector, we have partnered up with renowned shipyard Innovation Yachts to create a fully recyclable composite boat.

Our solution includes the end-of-life recycling of your LBV35.

We buy back the composite materials of your LBV35 and reuse them in future builds.

Even the moulds for the LBV35 have been built with fully recyclable material.

Leading by example, we are showing the nautical industry how boats can be built with respect for nature.

“

# Harnessing the power of the elements

## 100% Autonomous

Unlimited range,  
Endless possibilities.

### Solar panels

1.5 kWh  
charging capacity

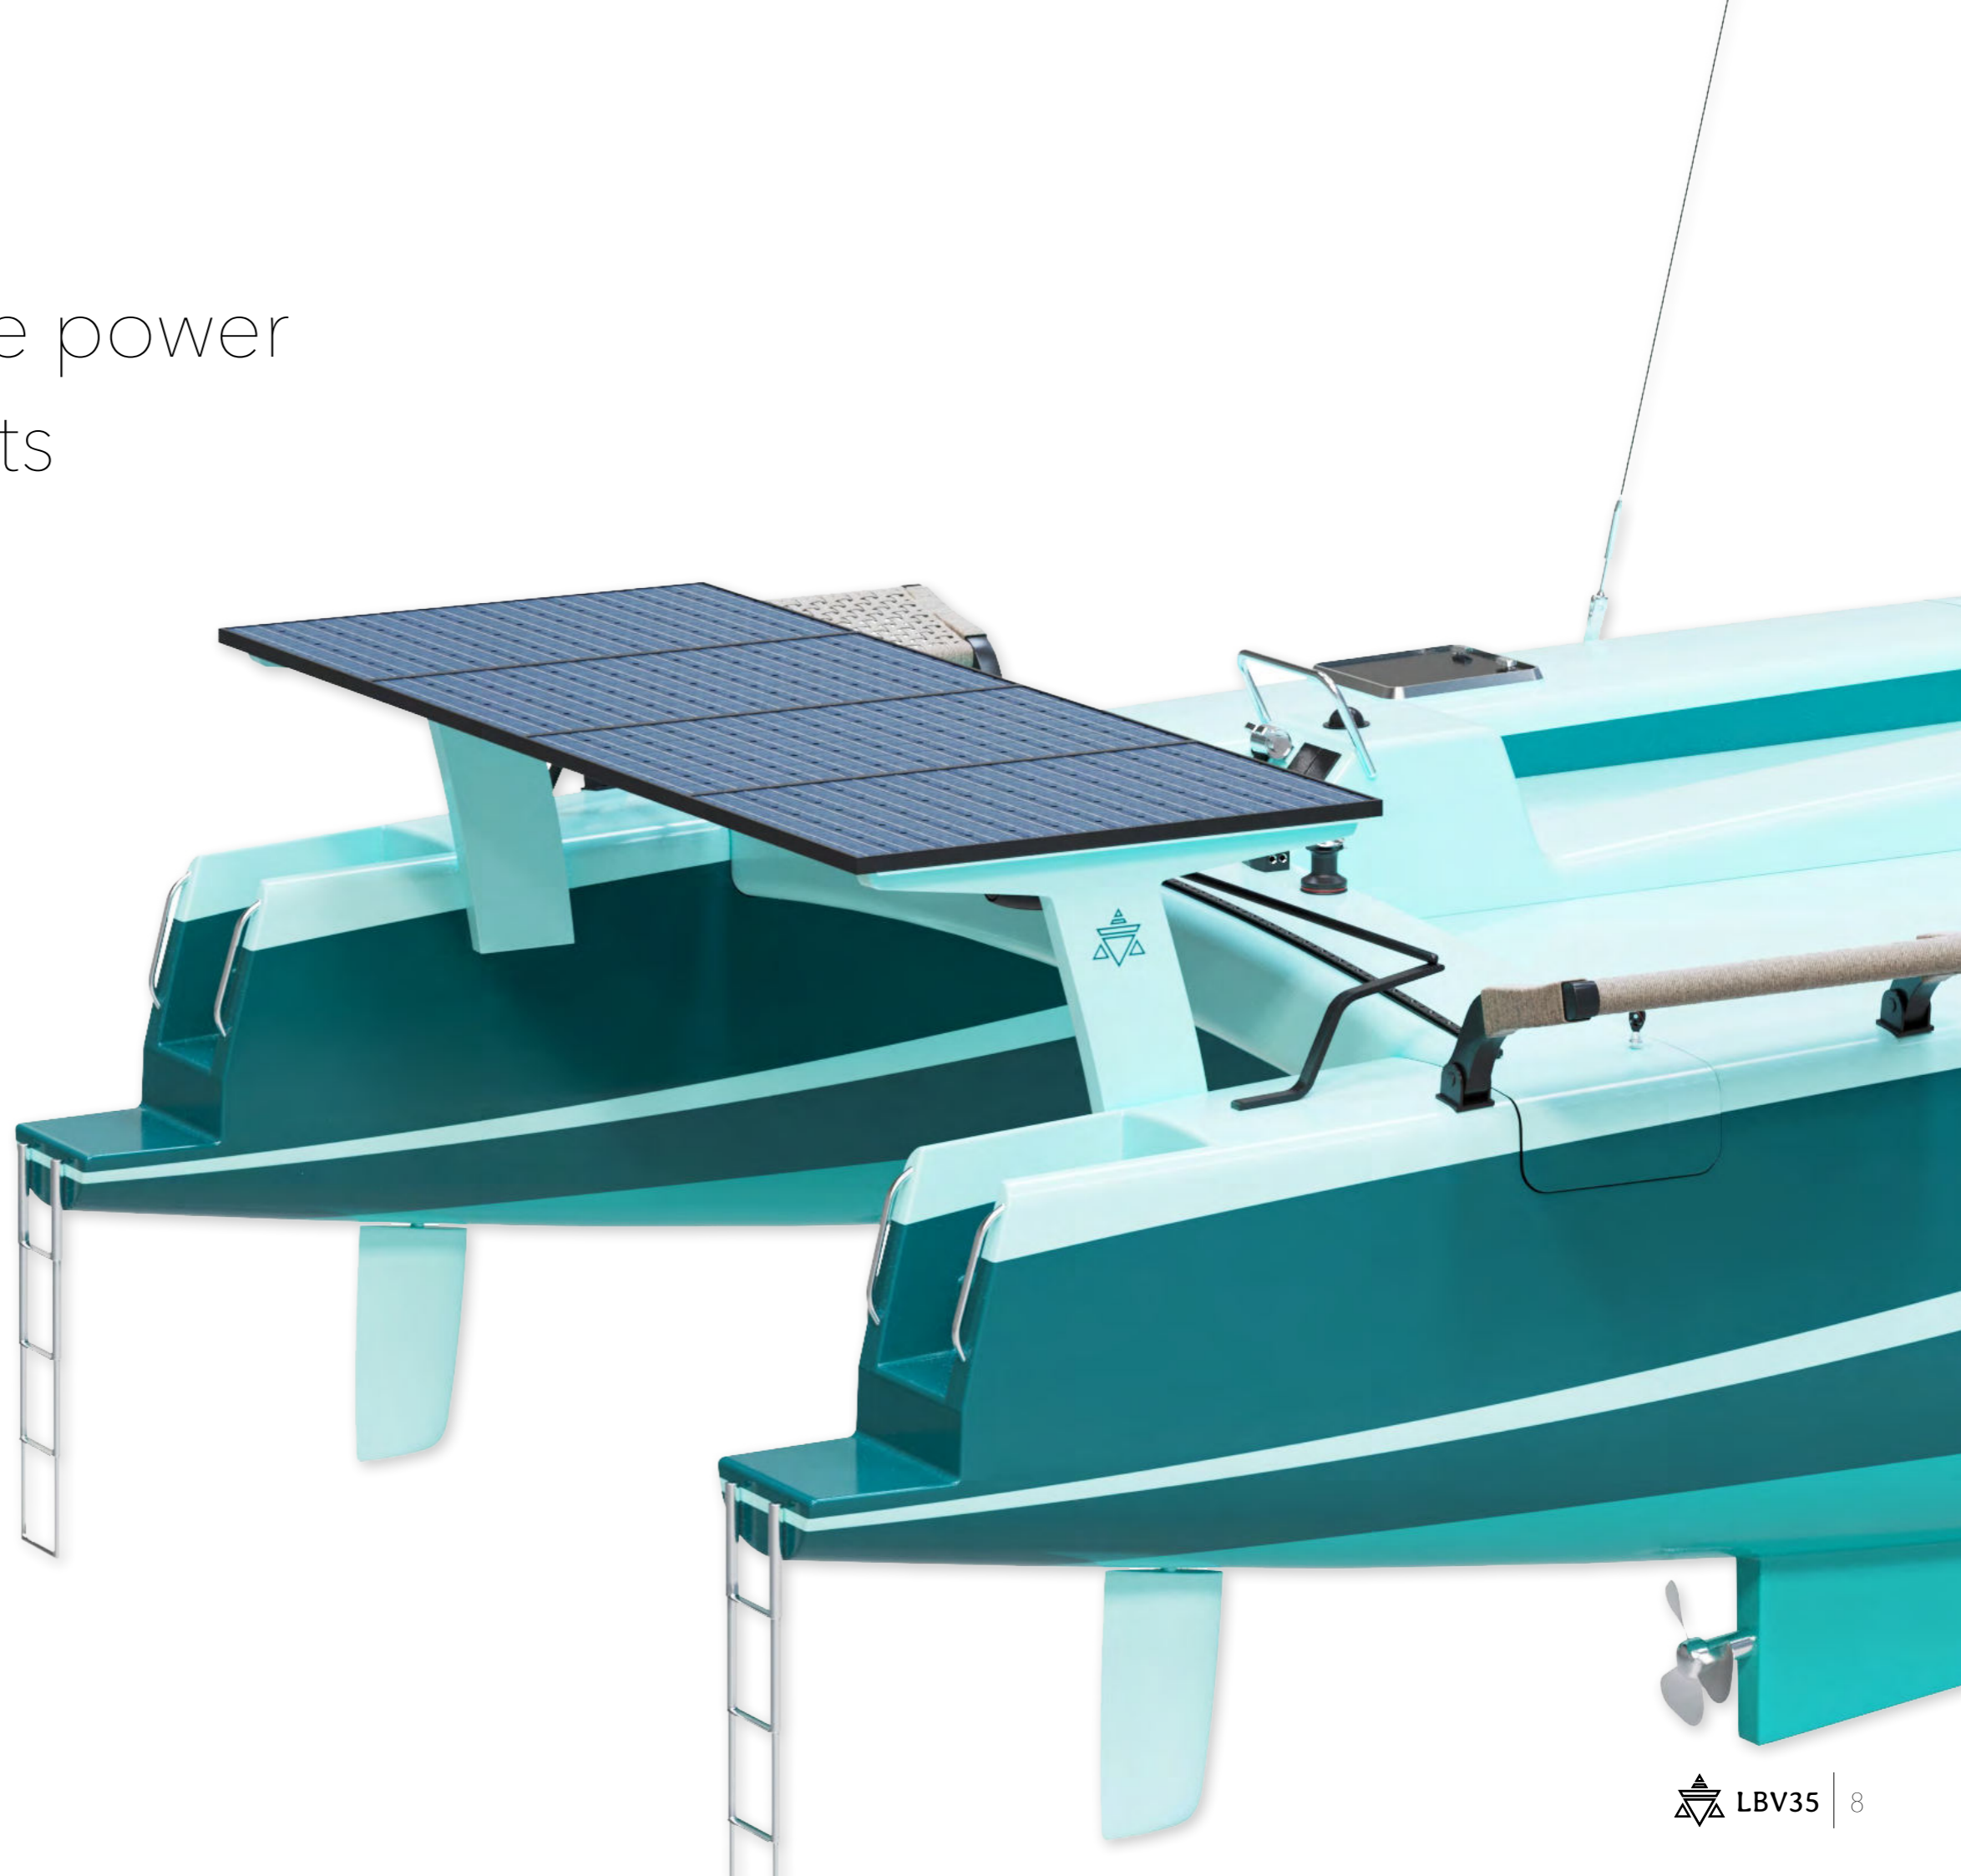

### Hydro-generation

A powerful range  
extender

No noise

No fossil fuels

No pollution

“

## High performance, single-handed

Using the experience of almost 30 years of extreme sailing, Norbert Sedlacek, founder of Innovation Yachts shipyard, created a rig and sails which give the LBV35 a powerful sailing performance.

The sail plan allows fast and safe sailing as well as easy handling for single-handed sailing.

We use well-established brands to guarantee long-lasting quality.

The LBV35 will be produced in the “Sailing Mecca” of Les Sables d’Olonne, one of the most prestigious harbours in France which is also the hometown of the famous Vendée Globe round the world race.

### **Sailing performance**

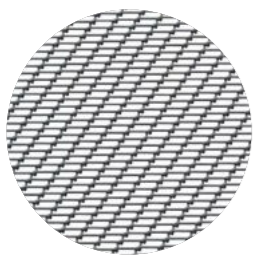

Cruising speed: 8-12 knots

Top speed: 22 knots

### **Gear**

Harken winches  
and deck equipment

### **Decking**

Trampoline style  
or hard deck

### **Sound system**

JL Audio  
Marine grade

“

Powerful,  
reliable and fun

### **Hull length**

10,58 meter

### **Beam**

5,56 meter

### **Draft**

0,90 meter

**Design category**

Category C with  
option for B

**Mainsail**

32,8 m<sup>2</sup>

Fully battened  
Lazy-Jack system

**Jib**

14,5 m<sup>2</sup>

Self-tacking  
Furlex

**Mast**

Seldén  
aluminium

**Anchor**

Lewmar windlass

**Plumbing**

2 fresh water  
tanks and a head

“

Green,  
clean &  
silent

## Power and propulsion

Fully integrated Oceanvolt system, providing reliable and sustainable power.

The Oceanvolt AX5 shaft-drive system is completely maintenance free.

### Electric motors

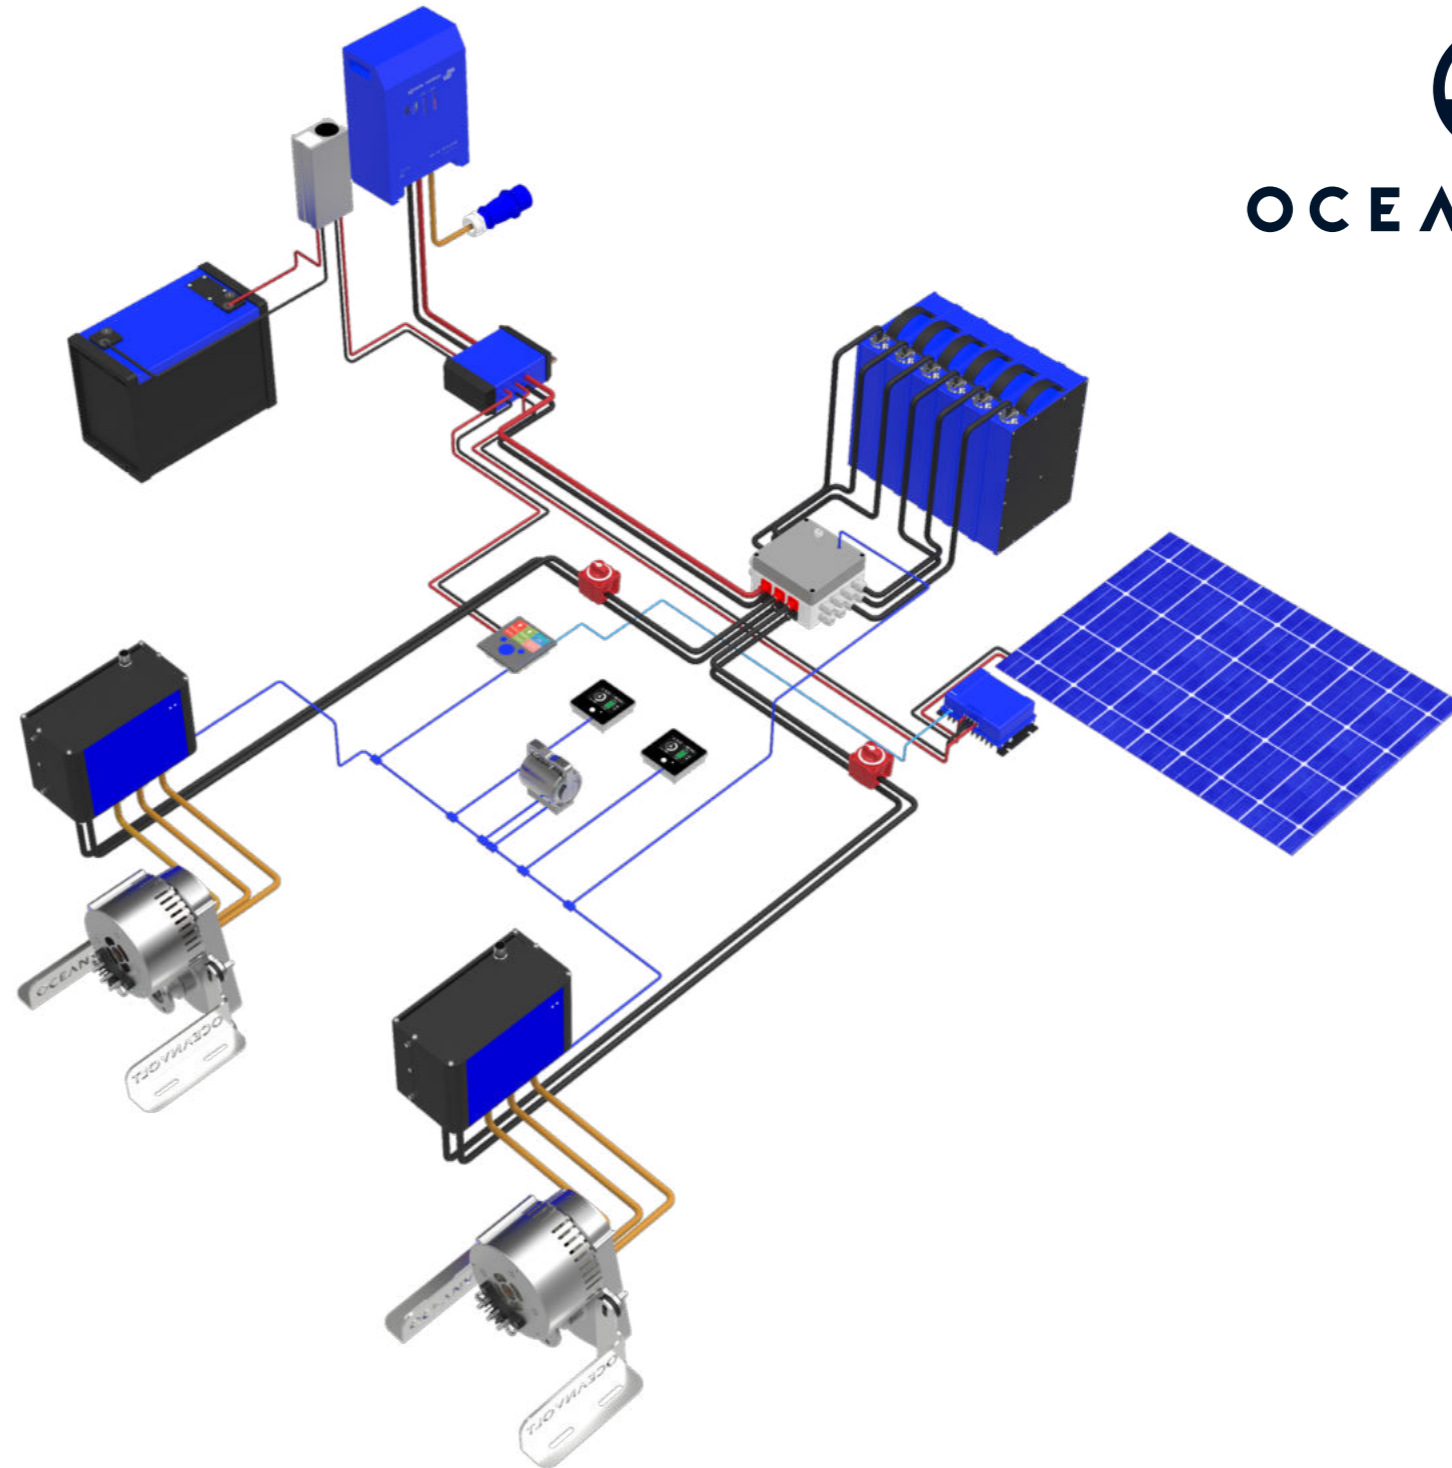

2 x Oceanvolt  
AX5 - 5.2 kW

### Batteries

10 x Oceanvolt 1,9  
kWh lithium battery

### Solar panels

4 x Sunpower  
X21 (345W)

Go next  
level  
with our  
options

### Sail-upgrades

**Fat head main sail 36.5 m<sup>2</sup>**  
Modern look, high performance.

**Cableless Code 0 - 42.5 m<sup>2</sup>**  
Extend your reach with this  
powerful foresail.

**Cruising Gennaker - 85 m<sup>2</sup>**  
Serious power, endless options.

### Deck area upgrades

**Hard deck**  
Add safety and comfort  
by replacing trampolines.

**Natural feel with  
recycled wood**  
Give your boat a natural  
touch with recycled  
wooden panels.

### Motor options

More economically  
accessible, recommended  
for inland waters.

**Motor**  
Torqeedo 4.0 POD

**Batteries**  
Torqeedo Power 48-5000

“

Cleaning  
our  
oceans

## Plastic Clean-Up System

In collaboration with the IBI Foundation we have designed a plastic clean-up system fitted to the LBV35. With this system we contribute to the solution of the massive amounts of plastic floating in our oceans by combining leisure-sailing with cleaning up the ocean. The Clean-Up System is optional on your LBV35.

“

Ready to  
take over  
the world

## Innovative Design

### Fast shipment

Fits a 40ft. container  
for fast shipment  
around the world

### Super easy assembly

3 days

### Manual

Step-by-step  
written and visual  
assembly-manual

“

Riding the  
waves, at one  
with the sea,  
let LBV set  
you free

## Franchise

If you are interested in running your own charter-company with the LBV35, we offer you the opportunity to open an LBV Franchise.

Operate under the LBV flag and get your charter-business off the ground instantly.

As an LBV Franchisee you get access to:

### Experience

LBV's knowledge after 6 years of day-charter operation in Ibiza.

### A strong online image

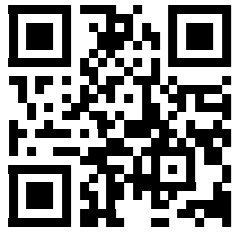

Landing page on the LBV Website.  
Social media with LBV content.

### IT Solutions

The custom-made LBV booking system.

### Marketing campaigns

Campaigns in your area, organized by LBV.
